

# G7 Industry Stakeholders Conference: Making the Energy and the Environmental Transitions Drivers of Competitiveness

Torino | 28<sup>th</sup> April 2024 | Ore 14.30  
Centro Congressi Unione Industriali Torino | Via Vela, 17

“Making the Energy and the Environmental Transitions Drivers of Competitiveness” is the second G7 2024 Industry Stakeholders Conference. Focusing on the G7 action by engaging the G7 business community in conjunction with the G7 Ministerial meeting on “Energy, Environment and Climate”, the Conference stands as a unique opportunity for Business to support the Ministers in addressing complex urgent challenges.

Under its claim “Leading the Transitions Together”, The B7 is committed to the best outcomes of the Italian G7 Presidency. Prominent CEOs, high-level representatives of the G7 Business and the financial sector, of International and Multilateral Organizations will assess the key factors for navigating the ongoing multiple transitions in a fast-changing global economy where the geopolitical frictions coupled with the increased demand of energy at global level call the public and private sectors on strengthening their partnership and heading towards shared objectives by leveraging best performing technologies, enhancing circularity, adopting common roadmaps, converging green taxonomies, priority-scaling investments and exploring renewable avenues while embracing the widest technological neutrality possible in order to meet the Paris Agreements decarbonization targets.
